Participant gender	*Female*
Test Date	*5/7/26*
Test Time	*7:30pm*
Total time taken	*10 minutes*
Test Introduction script	

- *Hi! Thank you so much for taking the time to help me out today. My name is Matthew Brunner, and I'm a computer science student at the University of West Georgia. I'm currently working on a senior project for my User-Centric Computing course where we're designing and building websites based on real user needs. This session should take about 15 to 20 minutes of your time, and I really appreciate you being here. I want to start by making something very clear: you are not being tested. There are no right or wrong answers here, and you can't make any mistakes. What we're actually doing is testing the website itself to see how well it works for real people like you. Your honest feedback— whether positive or negative—is incredibly valuable and will help me improve the design. The website I've built is called FreshStart, and it's a career transition platform designed to help adults in their 30s through 50s who are thinking about changing careers. It includes tools like a skills translator, mentor matching, training resources, and job opportunities. But I don't want to tell you too much more than that—I actually want to see how easy it is for you to explore and figure things out on your own without me explaining everything. By participating today, you're helping me understand what works well on the site and what might be confusing or difficult for users. I'm looking to get a general sense of the website's usability—things like whether the navigation makes sense, if the forms are clear, and if you can accomplish the tasks you'd expect to do on a site like this. Your perspective as someone actually using the site is way more valuable than just my assumptions about how it should*

work. As we go through this, I'm going to ask you to try completing some specific tasks, and I'd like you to think out loud as you do them—just tell me what you're thinking, what you're looking for, or if anything seems confusing. Again, there's no pressure to succeed at anything. If something doesn't work or you can't figure something out, that's actually really helpful information for me. The website is live at . I'll give you that link in just a moment, and we'll get started. Do you have any questions before we begin?	
The 10 Tasks users must complete and your observations Here you will ask the user to be at ease and complete the tasks listed below You must observe and collect/note necessary information on the left	
Task 1: Find and click on the Skills Translator tool	**Completed successfully: yes** **Time taken: 3 seconds** **Facial expressions: straight faced** **Any noises made: "Okay"** **Any other gestures made: none**
Task 2: Navigate to the registration page	**Completed successfully: yes** **Time taken: 2 seconds** **Facial expressions:** **Any noises made: "Okay"** **Any other gestures made: none**
Task 3: Fill out and submit the registration form	**Completed successfully: yes** **Time taken: 52 seconds** **Facial expressions: straight faced** **Any noises made: none** **Any other gestures made: tilted head back to read**
Task 4: Find information about available mentors	**Completed successfully: yes** **Time taken: 5 seconds** **Facial expressions: Straight faced** **Any noises made: "oh uh" *click*** **Any other gestures made: none**
Task 5: Browse training program options	**Completed successfully: yes** **Time taken: 2 seconds** **Facial expressions: straight faced** **Any noises made: none** **Any other gestures made: none**
Task 6: Read a success story	**Completed successfully: yes** **Time taken: 12 seconds** **Facial expressions: straight faced** **Any noises made: mumbled the words while reading** **Any other gestures made: none**
Task 7: Access the job board	**Completed successfully: yes** **Time taken: 3 seconds** **Facial expressions: straight faced** **Any noises made: "pretty easy"** **Any other gestures made: none**
Task 8 : Log in to an account	**Completed successfully: yes** **Time taken: 25 seconds** **Facial expressions: straight faced** **Any noises made: none** **Any other gestures made: none**
Task 9: Navigate from homepage to any feature page	**Completed successfully: yes** **Time taken: 8 seconds** **Facial expressions: squinted at me**

	Any noises made: "huh" **Any other gestures made: none**
Task 10: Use the Skills Translator to translate skills from one industry to another	**Completed successfully: yes** **Time taken: 31 seconds** **Facial expressions: thinking face** **Any noises made: "I dont even know what to choose"** **Any other gestures made: none**
User's opinions/comments/suggestions about the site	
Ask the users about the site and insert their answers here. • *User liked the easy and straight forward layout of the website* • *User didnt like how signup and login were similar to the other buttons and next to each other* • *User also loved the sleek design and cool colors*	
The "Thank You" note to conclude the test	
Thank you for your time and effort, we will take your comments and results into consideration to create the best possible website for our users	
Your experience, assessment of the Usability Test	
Nothing really change anything. It seemed sort of repetitive to do 10 tasks. Also I stated 5-10 minutes and it was 10 minutes	

Usability tests ran by all members

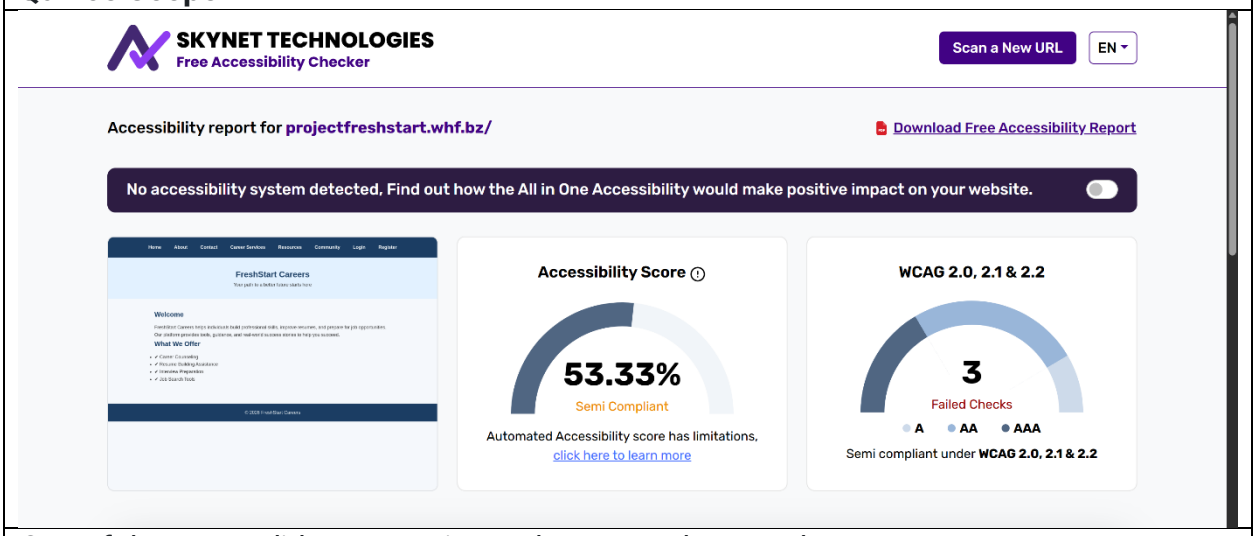
Participant gender	*Male*
Test Date	*5/7*
Test Time	*2 minutes*
Total time taken	*49 seconds*
Test Introduction script	
Insert here the introductory speech you gave to the participant to put her at ease and inform him/her about what is expected. You know from our Usability Testing lectures, and videos that an introduction is necessary. *The following items must be present here –* • ***Hello my name is Quince Cooper I'm a computing major and I would like you to explore this website to see if you can navigate it easily and this may take either 4 or 5 minutes max. This test is very helpful for me to ensure people will have a very user-friendly experience when looking into changing their career path and seeking guidance on what to do next relating to that path. Take your time as you think about the task as there is no set time limit and thank y for your cooperation.***	
The 10 Tasks users must complete and your observations Here you will ask the user to be at ease and complete the tasks listed below You must observe and collect/note necessary information on the left	
Task 1 (Can you make a new account for me with fake information)	**Completed successfully:** yes **Time taken:** 13 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 2 (Navigate to where you would learn about the website)	**Completed successfully:** yes **Time taken:** 4 seconds **Facial expressions: calm**

	Any noises made: none **Any other gestures made:**
Task 3 (navigate to where you would find help with a resume.)	**Completed successfully:** yes **Time taken:** 8 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 4 (Navigate to where you would find a job template)	**Completed successfully:** yes **Time taken:** 5 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 5 (Navigate to where you think events would be.)	**Completed successfully:** yes **Time taken:** 3 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 6 (Navigate to where you would find successful stories)	**Completed successfully:** yes **Time taken:** 3 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 7 (Navigate to where you would find help with interviews	**Completed successfully:** yes **Time taken:** 4 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 8 (Navigate to where you're looking to contact someone)	**Completed successfully:** yes **Time taken:** 2 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 9 (Navigate to where you are looking for tools for a job)	**Completed successfully:** yes **Time taken:** 5 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
Task 10 (click on a random page then navigate back to the home screen)	**Completed successfully:** yes **Time taken:** 2 seconds **Facial expressions: calm** **Any noises made:** none **Any other gestures made:**
User's opinions/comments/suggestions about the site	
Ask the users about the site and insert their answers here. *Questions that you must ask are below, but you are more than welcome to ask them other questions you deem necessary -* • *what they liked – They like the site's colors and overall, how easy it was to navigate around and find information* • *What they didn't like They did not like that the about and contact page was not working and felt like that information could be included in the home page.* • *what suggestions they can provide to make the site better for users- fix the about page and provide more detailed information about the events taking place.*	

The “Thank You” note to conclude the test
Thank you for taking this test and providing feedback on how to improve my website.
Your experience, assessment of the Usability Test
My test was very easy and straightforward to take. The user did not have any issues following instructions and that provided a smooth experience.

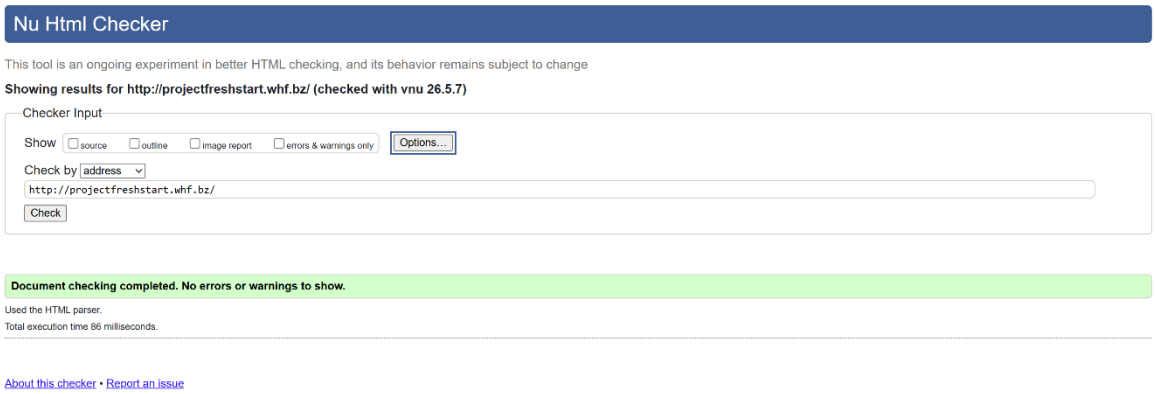
Accessibility tests and Markup validation

Quince Cooper



One of the pages did not contain an element and some elements on pages were not properly formatted

There pages were not completely disability friendly with the color contrast



There were no issues

Team’s assessments

Usability test results, discussions, analysis
Insert team discussions and analysis of all the usability test results. The following must be included here -

a. *summary and analysis of all the results from each member's usability test* *The analysis shows the elements on the website can be corrected or implemented better. A better contrast ratio can be used to create easier user experience for people with sight disabilities* b. *The future enhancements that can be made on the site based on analysis above.* *For future enhancements for the site I can fix the html elements, improve the color contrast and make the site links stand out more in something other can a blue link color*
Accessibility issues
The color contrast on pages with links can be better. I can change the blue color to be slightly darker and change the link color to something or then blue but leave a blue underline to suggest it's still a link
HTML Markup issues
The about and contact page does not function and I will need to link the pages to the site again, so they appear
